State Carbon Management Legislative Highlights

- **Colorado**: SB 22-193, *Air Quality Improvement Investments*. The bill creates the industrial and manufacturing operations clean air grant program through which the Colorado energy office awards grant money to private entities, local governments, and public-private partnerships for voluntary projects to reduce air pollutants from industrial and manufacturing operations. Possible projects include energy efficiency, beneficial electrification, producing or utilizing clean hydrogen or involving carbon capture at industrial facilities, and industrial process changes that reduce emissions.

- **Iowa**: HF 2565, *A bill for an act relating to and making appropriations involving certain state departments, agencies, funds, and certain other entities, providing for regulatory authority, and providing for other properly related matters, and including effective date provisions*, passed the Iowa House on March 30. The bill requires the Iowa Utilities Board not to set a public hearing with carbon sequestration pipeline companies requesting eminent domain before February 1st, 2023.

Bills previously referenced in the update include:

**Introduced**
- **California**: SB 1399, *Carbon capture and storage pilot program: industrial facilities*,
- **Pennsylvania**: HR 183, *A Resolution urging the Biden Administration and the Congress of the United States to designate this Commonwealth as a hydrogen hub*

**First Committee**
- **Minnesota**: SF 3661, *State policy supporting the deployment of carbon capture and sequestration technologies establishment (passed committee, March 14)*

**Enacted**
- **Alabama**: SB 36, *Oil and Gas Board, underground gas storage facilities, regulation, gas further defined to include abandonment of underground storage facilities, performance bonds, fees by board, Secs. 9-17-150, 9-17-151 am’d.*
• Indiana: HB 1209, Carbon sequestration projects,
• Mississippi: HB 1218, Carbon dioxide geologic sequestration; revise laws regarding,
• Nebraska: LB 1099, Create the Nebraska Hydrogen Hub Industry Work Group,
• South Dakota: HB 1120, Include carbon dioxide and carbon dioxide capture companies in certain provisions regarding pipeline taxation,
• Utah: HB 244, Geological Carbon Sequestration Amendments
• West Virginia: HB 4491, To establish requirements for carbon dioxide sequestration
• Wyoming: SF 47, Carbon storage and sequestration-liability.

DOE Selects 22 Communities for Communities LEAP program

The Department of Energy announced the 22 communities it has selected to participate in its “Communities LEAP (Local Energy Action Program) program” on March 29.

The program seeks to help communities access the economic and environmental benefits of clean energy and clean energy manufacturing. The selected communities will work with DOE, its national labs and other experts, government and non-governmental partners, community-based organizations, and utilities, as well as environmental, economic development, and equity organizations to develop roadmaps for clean energy economic development pathways. The communities will pursue strategies for planning and investment in:

• Energy efficient buildings and beneficial electrification
• Clean energy development
• Clean transportation and enhanced mobility
• Carbon capture and storage
• Critical minerals recovery
• Resilient microgrids and energy storage
• Manufacturing and industry opportunities

For more information, visit the DOE’s Communities LEAP program page

Council on Environmental Quality and EPA Release BETA Version of Climate and Economic Justice Screening Tool

The Council of Environmental Quality (CEQ) and the Environmental Protection Agency (EPA) recently released a BETA version of its Climate and Economic Justice and Screening tool. The Council on Environmental Quality (CEQ) was directed to create a Climate and Economic Justice Screening Tool in Executive Order 14008. The tool’s purpose is to help Federal agencies identify disadvantaged communities that are marginalized, underserved, and overburdened by pollution.
The current version of the tool provides socioeconomic, environmental, and climate information to inform decisions that may affect these communities. The tool identifies disadvantaged communities through publicly-available, nationally-consistent datasets.

CEQ is hosting public listening sessions to seek input and feedback on the beta version of the tool. Based on the feedback it receives, CEQ will update and refine the tool to ensure that it reflects the environmental, climate and other challenges that communities are experiencing.

- Read about and use the Screening Tool here.
- Register for the CEJST Public Listening Session #2

### Oxy Low Carbon Ventures and Weyerhaeuser to partner on carbon hub

On March 28 Oxy Low Carbon Ventures and Weyerhaeuser Company announced their agreement for the evaluation and potential development of a carbon capture and storage project in Livingston Parish Louisiana.

The lease agreement provides Oxy with rights to develop and operate a carbon sequestration hub on more than 30,000 acres of subsurface pore space controlled by Weyerhaeuser. Weyerhaeuser will continue managing the aboveground acreage as a working forest and Oxy will use the land to permanently store carbon dioxide (CO2) underground.

### West Virginia Federal Legislators Request Update from EPA on Class VI Regulations

On March 30, Representative David B. McKinley, P.E., Senator Shelley Moore Capito and Senator Joe Manchin III, all from West Virginia, sent a letter to the US Environmental Protection Agency (EPA) requesting an update on EPAs action regarding Class VI regulations. The EPA regulates the underground injection of CO2 through its Underground Injection Control (UIC) program. Class VI wells are used for the geologic storage of carbon dioxide and states can apply for primacy, which gives a state permission to regulate Class VI wells at the state level.

The legislators noted that section 40306 of the Infrastructure Investment and Jobs Act (IIJA) included significant investments for states’ ability to permit, site and monitor carbon sequestration wells. They requested an update on EPA’s efforts to implement section 40306, as well as the EPA’s plans to approve state applications to permit, site and monitor carbon sequestration wells.

Alberta Selects Six Carbon Hubs Proposals

The Canadian province of Alberta announced its selection of six carbon hubs proposals to move forward with developing Canada’s first carbon storage hubs on March 31. The hubs will help reduce CO₂ emissions in Alberta’s industrial heartland region near Edmonton by permanently sequestering them underground.

Projects include:

- Meadowbrook Hub Project by Bison Low Carbon Ventures Inc.
- Open Access Wabamun Carbon Hub by Enbridge
- The Origins Project by Enhance Energy Inc.
- Alberta Carbon Grid by Pembina Pipeline Corp. and TC Energy Corp.
- Wolf Midstream and partners
