Join GPI's Team as a State and Regional Associate

The Great Plains Institute’s carbon management team is looking to hire a State and Regional Carbon Management Program Associate to provide program assistance and administrative support across the carbon management team’s projects. The associate will have primary responsibility for administrative and support tasks and take the lead in planning the State and Regional Carbon Management project meetings and events.

We would greatly appreciate it if you could share this job listing with your stakeholder networks. Please feel free to reach out with any questions about the position.

National Energy Technology Laboratory announces new Direct Air Capture Center

Last week, the National Energy Technology Laboratory (NETL) announced that they will be opening a new Direct Air Capture Center at NETL’s Pittsburgh campus which is scheduled to begin operations in the Summer of 2024. The center will focus on accelerating the deployment of direct air capture technologies through research into their performance in varying climates, testing both for diverse temperatures and humidities.

You can read more about NETL’s new center in their announcement here.

Upcoming events

March 9
- **NETL Energy 101 Webinar: Point Source Carbon Capture | netl.doe.gov**
  Join NETL Thursday, March 9, from 10-11 a.m. (ET) for a discussion with a point source carbon capture expert and learn about the regional economic and workforce development opportunities this technology is expected to generate. The webinar will begin with comments from Anthony Armaly, coordinator of NETL’s Regional Workforce Initiative (RWFI), followed by a presentation by Ron Munson, technology manager, Point Source Carbon Capture, and an economic and workforce development roundtable discussion.

March 16
- **Looking Ahead: Unpacking the EIA 2023 Annual Energy Outlook (rff.org)**
  The U.S. Energy Information Administration (EIA) will release its 2023 Annual Energy Outlook (AEO2023) at a live event hosted by Resources for the Future (RFF). The AEO2023 models projections of domestic energy markets through 2050 to explore a variety of different assumptions about economic growth, world oil and gas prices, and technological innovation.

April 25–27
- **About CCUS 2023 (ccusevent.org)**
  Plan now to attend Carbon, Capture, Utilization, and Storage (CCUS) 25–27 April 2023 at the University of Houston in Houston, Texas. Themed "An Emerging Field for Energy Professionals," this in-person event will unite AAPG, SPE, and SEG and highlight current CCUS work and address related challenges, including Subsurface Geologic Storage, CO₂ Enhanced Hydrocarbon Recovery, Reservoir Monitoring and Risk Assessment, Case Studies, Industry Applications, Economics, Incentives, and Policy Infrastructure.

About the Regional Carbon Capture Deployment Initiative: The Regional Carbon Capture Deployment Initiative brings together state officials with diverse industry, NGO, labor, and other stakeholders to promote broad scale deployment of infrastructure for carbon management. The Initiative is staffed by the Great Plains Institute (GPI), a nonpartisan nonprofit working to transform the energy system to benefit the economy and environment.
